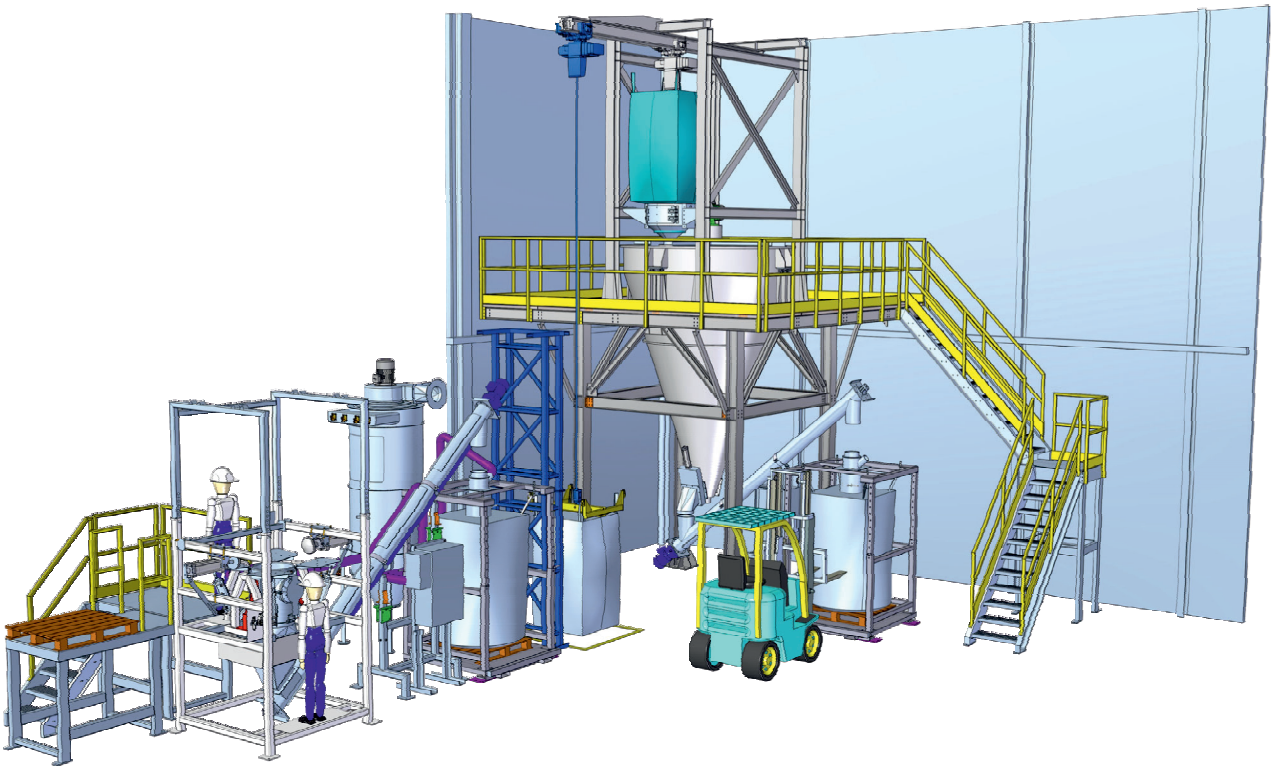
## TAYLOR-MADE SOLUTIONS TO YOUR WEIGHING NEEDS

STAD
Automatic weighing systems



STAD specializes in the static and/or continuous weight dosing of all bulk solids (powders, granules, and bulk solids) used in any industrial sector.

We can test product samples during the quote phase to evaluate process feasibility and the precision achievable with our systems.

To complement the service we offer our customers, we can design and build small, complete systems capable of extracting, dosing, weighing, transporting, mixing, receiving, and storing these products, as well as liquids.

Each of our machines is customized based on the needs of the product sector and the characteristics of the product being handled; therefore, our production uses components ranging from painted carbon steel to stainless steel with a food-grade finish.

## RANGE MACCHINE

- FIBC Loading / Unloading
- Manual sack unloading
- Conveyors
- Pneumatic transport
- Gravimetric feeding
- Mixers
- Silos / Hoppers
